Service description

Description

Audio-visual transmission of lectures and events at ETH events in auditoriums equipped (cf. "Instructions / FAQ / How To" below).

Customer Benefit

Customers can stream lectures and events in other available auditoriums for lectures and events where the audience size is too large to fit in a single auditorium. Recording is also available at a low additional cost.

Customer Groups / Cost / Order

All organisational units of ETH can request an auditorium to auditorium AV transmission. The transfer of the beamer signal (VGA or HDMI) and audio is free in suitably equipped rooms. However if the auditorium is not equipped with suitable equipment then the recording must be done manually and a fee is involved. The cost depends of the duration of the event and the amount of work required. Based on our rates (cf. "Instructions / FAQ / How To" below), we provide an offer based on a program or the duration of the event. Requests should be made as early as possible as personnel have to be organised.
